

# magkraft™

## CENTRIFUGAL TUBE & STAND

Centrifugal tube is used to measure the concentration of powder in the bath. Available in two bottom sizes of 0.5ml and 1.0ml. Total Volume of the tube is 100ml. Complies with ASTM D-96. Stand is made of 16 SWG MS Sheet & Powder Coated for rust prevention.

## STEADY ROLLERS

Available in fixed height & adjustable height models. These rollers are placed on the machine & the job to be tested is rested on these rollers. The job can be easily rotated on these rollers for 360 degree inspection. Adjustable height model allows components with different sizes to be clamped properly in the machine and also helps to place the component as desired.

## COPPER BRAIDED CONTACT PADS

Are placed in front of copper contacts to avoid arcing when there is heavy current flow & the contact is not proper. Two Types of Designs are available. One with Hooks & the other one compatible with Magnaflux Design. Non Standard Sizes can be made against order.

## PRODS

Prods are used to pass current through jobs which can't be loaded on the bench type equipment. One of the prods of the pair comes with an inbuilt push switch & cable.

## CABLES

Flexible Copper Cables of 70mm<sup>2</sup> and 120mm<sup>2</sup> are available in standard lengths of 3m, 5m & 10m. Both the ends are fitted with copper lugs.

## COPPER CENTRAL CONDUCTORS

Central conductors are used to inspect hollow or annular parts. These are available in various diameter and length combinations

## UV PROTECTION GOGGLES

These goggles protect the eyes of the operator from the harmful effects of UV radiation.
